

*Our work has inherent safety risks... both for ourselves and for our surroundings.
In fact, some of the tasks we have to carry out are potentially a risk to life.
This is why safety is the top priority within Strukton Immersion Projects.
We put safety first, always and everywhere, day and night 24Safe !*

Our ambition

No one suffers an injury!

Our mission

Focusing on safety together!

Our vision

- Nothing we do is so important that it is worth risking an injury;
- Working safely is an integral part of the professionalism of our people and of the people with whom we work. Safety is embedded in our company's DNA;
- For us, safety is an essential prerequisite for success.

Our approach is characterised by:

Our values and standards

- Safety is a permanent value and not a temporary priority;
- Safety starts with you as an individual. It revolves around 'us', not 'them'. It's about shouldering your own responsibility and discussing safety and/ or unsafe situations with one another. We are always open to receiving feedback and we deal with it in a professional and respectful manner;
- We have the responsibility to protect our own safety and that of others, and to make – and keep – each other aware of potentially unsafe situations;
- We ensure that we and others learn from our safety experiences. We share information for risk management purposes and to prevent repeat incidents;
- Our attitude towards safety is positive, constructive and focuses on good practices. However, in case of a breach of the safety rules and regulations that we have agreed upon, we respond keen.

Guiding principle

Our guiding principle is always... 24/7, 24Safe!

Do not start working if the safety measures are not known, have not been shared and/ or are not in place.

Focusing on safety together!
